

Yufei Ye

Career Objective: UX/UE Designer; WEB

 Birthday: 1999.07.20

 Address: Wuhan, Hubei

 Phone: 19947579190

 E-mail: yufeiyekamila@163.com

EDUCATION

2017.09 - 2021.09

University of Toronto CGPA 3.13

Computer Science / Bachelor

Programming language courses; human-computer interaction; data structure; logic and algorithms; sociology; psychology, etc.

PROJECT

2021.03 - 2021.03

Usability Analysis for App "Evernote"

UX / Prototype

I carried out the heuristic evaluation on its app interface and designed a usability test. I tested several participants, observed and recorded their behavior while completing the tasks, and held a follow-up interview afterward. Base on the result, I analyzed the design of this product, raised its shortcomings and the relevant improving plans, and finished a corresponding prototype. Finally, I integrated a comprehensive usability test report.

2019.09 - 2019.12

Believe Initiative Web-page Production (School-enterprise Cooperation)

Web / Front-end

This project used React to realize web-page production. In this project, I helped the team finish designing the web page's overall layout and was responsible for producing part of the front end. Since this project cooperated with an off-campus company, therefore, to complete their goal within the specified time, we fully understand their needs in our communication.

2018.05 - 2018.08

Simulation of Toronto Transit Commission

Software / Algorithm

This system simulated the back-end management and the ticketing system of the Toronto Transit Commission. In this project, I used Java to assist the team in completing the back-end ticketing algorithm and the log entry. I completed part of the production of the GUI interface and connected it with the front-end. The final mark for this project was 90.

SKILLS

Portfolio: <https://github.com/YufeiYe/HCI.git>

Professional Skills: C/C++, Java, Python, JavaScript, HTML, CSS, Axure, Photoshop

Language Skills: English IELTS 6.5

SELF-ASSESSMENT

1. I am good at finding out problems, responsible at work, and willing to communicate. I could start to use other software or programming languages quickly in various inside and outside school projects. I have a strong execution ability and team spirit. I always respect and get along well with others in life.
2. I have nine years experiences of using Photoshop. I also had a summer internship in a professional design company, which provided me with the creation and aesthetic foundation for designing and producing prototypes. I also accumulated a lot of experience in communication with customers and meeting their needs.
